

Prashant Uppar

Belagavi, India | prashantuppar2004@gmail.com | +91-8050018611 | <https://www.linkedin.com/in/Prashantuppar>
<https://github.com/Prashantuppar618> | <https://prashantuppar618.github.io/prashantuppar-portfolio>

Profile

Computer Science and Engineering student with interests in Machine Learning, Automation, and Software Development. Experienced in building models and software solutions with a focus on clean, maintainable code, and eager to apply technical skills to real-world projects.

Experience

Vigil Safety Technologies, Belagavi, India

May 2025 – Present

Machine Learning Intern

Contributing to RetinaFace-based facial recognition for intrusion detection and developing video management software with real-time analytics.

Education

KLE Tech Dr. MSSCET, Belagavi

Pursuing

B.E. in Computer Science and Engineering | CGPA: 9.37 (up to 6th sem) [86.2%]

KLE RLS College, Belagavi

Aug 2020 – Feb 2022

PUC in Science | Percentage: 96.33%

Technologies

Languages: C, C++ , JavaScript, SQL, Python, Solidity

Databases: MySQL

Tools & Platforms: AWS (EC2, S3), Docker, Ansible, Git, GitHub, Google Colab, ETL, Arduino IDE

Projects

HimRakshak – Border Surveillance CanSAT System

[GitHub Repo - 2025](#)

- Engineered an autonomous CanSAT system for border surveillance with motion, environmental, and GPS sensors.
- Developed a real-time data visualization web app for monitoring and analysis.

Technologies Used: React.js, Node.js, MongoDB Atlas, ESP32, ThingSpeak API

Spam Message Detection & Domain Classification

[GitHub Repo - 2025](#)

- Built an ML-based platform for spam message detection and domain classification using NLP techniques.
- Designed an end-to-end pipeline from model training to deployment with interactive UI.

Technologies Used: Python, Google Colab, NLP, Logistic Regression, Flask, React.js

Fee Payment Transparency with Blockchain

[GitHub Repo - 2025](#)

- Designed a decentralized platform ensuring secure, transparent, and tamper-proof student–institution transactions.
- Implemented and deployed blockchain-based smart contracts with a user-friendly interface.

Technologies Used: Solidity, Web3, Ganache, MetaMask, JavaScript

Achievements

- Asteria 2023 Hackathon (KLE MSSCET)** – Secured **First Place** for developing *Doctor AI*, a deep learning model for disease prediction, tablet recommendations, and symptom analysis.
- Pleiades 2025 Hackathon (KLE Tech)** – Earned **Honourable Mention** for designing a CanSAT and a Web UI to analyze environmental and sensor data.

Certifications

- JNCIA-Junos Certificate (2025)
- Applied GenAI (2025)
- DevOps Foundation Certificate (2024)
- Introduction to Machine Learning – IIT Kharagpur (2024)
